

OpenCollab:
A Blockchain Based Protocol to Incentivize Open
Source Software Development and Governance

Yondon Fu

April 24, 2017

1 Introduction

1.1 Bounty Systems

2 Background

2.1 Electronic Cash Systems

2.2 Digital Time-Stamping

2.3 Blockchains

2.4 Cryptographic Primitives and Data Structures

2.5 Bitcoin

2.6 Ethereum

3 Decentralized Git Workflow

3.1 Mango

3.2 Extensions to Mango

4 OpenCollab Protocol

4.1 Protocol Roles

4.2 OpenCollab Token

4.3 Voting on Issues

4.4 Opening Pull Requests

4.5 Merging Pull Requests

4.6 Adding Maintainers

5 Conclusion
